

Caelan Ross

Sherwood Park, AB (780) 554-8861 caelan.ross@gmail.com github.com/Caelan-Ross caelanross.netlify.app

Summary

- Full-Stack developer with experience in Next/React.js, Typescript, C#, and SQL who independently delivers complex projects, integrates AI tools into daily workflows, and brings hands-on Linux/infrastructure knowledge from running a self-hosted production environment.

Technical Skills

- Frontend: JavaScript, TypeScript, React, Next.js, HTML5, CSS, MUI
- Backend: C#, ASP.NET Core MVC, Python, Perl, SQL, MySQL, MariaDB, DB2
- Infrastructure: Proxmox, TrueNAS, ZFS, Docker, Docker Compose, Ubuntu Server, Linux
- Networking & Storage: SMB/CIFS, Pi-hole, NAS Administration, Hardware Troubleshooting
- Cloud & Backup: Rclone, Cloud Sync
- Dev Tools: Git/GitHub, ESLint, Visual Studio Code, Windows Terminal
- Dev Practices: Code Reviews, Reusable Components, Database Integration/Design, Automation
- AI-Assisted Development: GitHub Copilot, Claude – debugging, code generation, architecture planning

Education

University of Alberta – Diploma in Full-Stack Web Development
Dec. 2021 – Sept. 2023

Professional Experience

Web Developer – First Canadian Insurance (Feb. 2024 – Present)

- Delivered 200+ enhancements and bug fixes in Git using feature branches with minimal revisions during code review.
- Authored detailed technical documentation for internal projects, reducing onboarding time for new developers by 30%.
- Participated in SCRUM and coordinated project timelines with stakeholders.
- Reviewed peer code for safety, consistency, and readability, improving overall code quality.
- Contributed to high-priority, large-scale product tools under tight deadlines.
- Leveraged AI tools (Claude, Copilot) to accelerate debugging and solution design on complex legacy and modern codebases.

Junior Full-Stack Web Developer – CreativeMITE (Mar. 2021 – Dec. 2023)

- Built backend and frontend components for client web apps using C#, Next.js, and SQL.
- Presented deliverables to clients and implemented iterative feedback for optimized solutions.
- Managed Google Ads campaigns by analyzing seasonal trends, improving ad performance.
- Researched and recommended internal tool adoptions to streamline daily operations.

Projects

Protection Product Cost Sheets – First Canadian Insurance (Internal)

- Reduced manual PDF updates by 100% through reusable front-end components in Next.js.
- Enabled real-time dealer pricing lookup via URL-based query selectors and SQL-backed APIs.
- Built complex data parsers and mappings to support 10+ product sheet variants.

Tech Stack: Next.js (TS), SQL, ESLint, MUI, VS Code

Pre-Authorized Credit Modernization – First Canadian Insurance (Internal)

- Designed 6 new DB2 tables (avg. 6 columns each) as value-definition tables supporting 1 major overhaul — expanding it from 10 to 20 columns while preserving backward compatibility with existing functionality.
- Built a dynamically generated popup in vanilla JavaScript for the legacy system, consuming internal APIs to serve content without a framework dependency.
- Developed a new API endpoint for secure cross-origin internal content delivery, using HMAC-based secret key pairs and request timestamps to validate request authenticity.

Tech Stack: Next.js (TS), SQL, ESLint, MUI, VS Code

Self-Hosted Homelab Infrastructure – *Personal* (Multiple Repositories.)

- Deployed and maintain multiple Proxmox hypervisors hosting 5+ VMs and LXC containers running production-grade self-hosted services.
- Configured and maintain a TrueNAS SCALE deployment with ZFS RAIDZ1, SMB shares for ~16TB of managed storage, and automated cloud backup via Rclone for important files.
- Diagnosed and resolved a hardware-level NIC instability bug (Intel I219-LM) by disabling offloading via bridge config, eliminating recurring network drops.
- Managed multi-service Docker Compose stacks including Jellyfin, Paperless-ngx, and Immich with persistent storage and NAS-backed volumes.

Tech Stack: Proxmox, TrueNAS SCALE, ZFS, Docker Compose, Ubuntu Server, Linux, Rclone, SMB/CIFS

Monthly Report Generator – CreativeMITE (Internal)

- Reduced reporting time from 6 hours to under 5 minutes per cycle, saving \$1,500+ per month.
- Built automation to extract .zip data, process Excel sheets, and populate Word docs.
- Covered the analytics across 8+ hotels and shrunk them into meaningful tables and graphs.

Tech Stack: C#, VBA, Crazy Egg, Visual Studio, Windows Terminal
